

PHOS Zn

RESISTANCE INDUCTOR
EC FERTILIZER
NP fertilizer solution with zinc

COMPOSITION (%w/w)

Total nitrogen (N)	3%
Ureic nitrogen (N)	3%
Water-soluble phosphoric anhydride (P2O5)	34%
Water-soluble copper (Zn)	10%

PHOS Zn is a liquid fertilizer with zinc, phosphorus and nitrogen and it has been developed to prevent and resolve phosphorus and zinc deficiencies and to improve seed germination and post-transplantation. In addition, the formulation has an ascending and descending function so it allows the nutrients to reach all the plant organs in order to protect the treated crop against biotic and abiotic factors. PHOS Zn synthesizes phytoalexins which have a recognized antifungal activity.

DOSAGE AND METHODS OF USE	CROPS	APPLICATION	DOSE
FOLIAR	Fruit/Citrus fruits Horticultural Floricultural Industrial	2-3 Throughout the cycle	100 - 150 ml/100 L of water
FERTIGATION	Fruit/Citrus fruits Horticultural Floricultural Industrial	2-3 Throughout the cycle	4 -6 L/ha

Warnings: Shake the product well before use. For any mixtures with other products, make preliminary tests. Observe the dosages shown. The product is not combustible and is stable at ordinary temperatures and pressures. Store the product in adequately ventilated rooms at temperatures between + 5 ° C and + 35 ° C.
